# Security risk assessment report

| **Part 1: Select up to three hardening tools and methods to implement** |
| --- |
| 1. Firewall maintenance<br>2. Configuration checks<br>3. Multifactor authentication (MFA) |

| **Part 2: Explain your recommendations** |
| --- |
| 1. Firewall maintenance helps to keep the firewall system in check, checking and updating security configurations regularly to stay ahead of potential threats.<br>2. Configuration checks to see if there are any unauthorized changes to the system.<br>3. Multifactor authentication (MFA) : A security measure which requires a user to verify their identity in two or more ways to access a system or network |
